

MPN

NORMAL PRIMING MAGNETIC DRIVE
CENTRIFUGAL PUMPS PVDF OR PP

MPN

Normal priming, magnetic drive centrifugal pumps

- Housing and impeller materials:** PVDF, PP
Elastomers: EPDM, FKM (e. g. Viton®), FEP, FFKM (e. g. Kalrez®)
Bushing materials: PTFE-GF, Al₂O₃-ceramics, SiC (silicon carbide), graphite carbon

The MPN series is one of the most proven plastic magnetic drive pumps in the industry. Having been continuously improved over the decades, there are some ten thousand MPN pumps in use worldwide. The MPN series features a contact- and abrasion-free magnetic drive system, so that no mechanical seal is required to seal the pump.

PERFORMANCE CHART

Advantages:

- + Hermetically sealed and absolutely leak-free (no mechanical seal)
- + Particularly suited for toxic, environmentally harmful and corrosive media
- + Runs in partial dry run conditions due to large diameter slide bearings

Solid particles up to 3 mm in size and 10% volume are allowed. The maximum viscosity is 150 mPas; the maximum allowed temperature is 95°C. All sizes are also available in ATEX-certified versions under the name MPN-EX for ATEX zones 1 and 2.

DESCRIPTION

Characteristics | Chemical-resistant, single-stage, magnetic drive centrifugal pump

Features

- Hermetically sealed and absolutely leak-free (no mechanical seal)
- Powerful magnetic drive with neodymium magnets
- Practically maintenance-free in normal operation due to extra-large slide bearings
- Runs in partial dry run conditions due to large diameter PTFE slide bearings - design without impeller shaft
- All wet parts made of high-quality, corrosion-resistant plastics (PVDF or PP)
- Threaded connections (ISO 228-1) as standard
- Optionally available with flanges (from size 130)
- Universally applicable, low-noise and compact close-coupled design
- Approved for use in explosive atmospheres ATEX zones 1 and 2
- Optionally available with housing parts made of conductive plastic with approval for ATEX zone 1
- Corrosion-resistant paint finish
- All stainless steel screws in 1.4571 (316Ti)
- FDA-certified materials (PVDF versions)

Fields of application

Delivery of acids, bases, lye or other corrosive, harmful or toxic liquids in such applications, where even small leakages are not acceptable and a hermetically sealed pump is required.

Delivery of highly pure and sensitive liquids, where contamination must absolutely be avoided.

For example in the following applications:

- Plating and surface coating
- Semiconductor technology and solar cell production
- PCB and electronics manufacturing
- Wastewater and fresh water treatment
- Laboratory equipment and medical technology,
- Emission controls and gas scrubbers
- Battery production and energy storage
- High-purity applications, demineralized water, ultrapure water
